Detailed formatting guidelines

First line: Title in normal (not bold) capital letters, justified to the left. For latin names, gene symbols and other such cases, non-capital letters are allowed and the generally accepted formatting is followed (e.g.: OLIVE TREE (*Olea europaea*, L.)).

Following line: empty

Following lines: Byline (author(s) name(s) without titles, and affiliations). Normal letters, justified left. The given name of authors may be either written out in full or listed by initials. Initials are followed by a period. If two initials are listed, do not include a space between them but provide a space before the family name. The family name is always presented after the given name, even for those countries that use a different sequence. The affiliation or address of authors appear below the name(s). Numbers in superscript following each author's name, will be used if different authors belong to different Institutions. In this case, different affiliations will be presented in different lines.

Following 2 lines: empty

Rest of the paper: The manuscript should be presented in the following format:

Abstract
Keywords
Introduction
Materials and Methods
Results
Discussion
Acknowledgements
References

Results and Discussion sections can be merged. The invited speaker manuscripts do not have to follow the above outline.

Specific formatting guidelines

A single line is left empty for separation of different chapters

Each chapter's title should be justified left, with normal lettering (not bold, not capital) and underlined (e.g. Abstract).

The main text within each chapter should be fully justified with first line indentation of 0.5 cm.

The References should be on the following format (fully justified, no first line indentation, indentation for rest of the lines of 1 cm):

Johnson N., Miller S., and Smith D. 1975. Olive Growing in Mediterranean area. Elsevier, Amsterdam, pp 174.

Smith M., and Watson D.L. 1996. Rate of growth in peat culture. In: Peat and Plant Yearbook 11:14-16.

Smith, O. 1988. Effects of environment on flower initiation. J. Hort. Sci. 37:219-234.

Tables and Figures

All Tables and Figures should be incorporated in the text in their final format and size, located as close as possible to the relevant reference.

The legends should be above the Table and below the Figures.

Appropriate numbering should be applied, with reference in the manuscript as: Table **, or Fig. **.
